- /Admin/MarkBarber

Routes

Each route will receive a payload with the necessary information to perform the operations required.

- /addcustomer
 - Add a customer to the end the table with their names
 - Fills out the necessary entries in the table
- /getstatus
 - Reads from the table and gets wait time and people ahead of the customer (searches by name)
- /admin/addcustomer
 - Admin version of adding customer to portal
- /admin/removecustomer
 - Removes a customer line from the table
 - Accordingly, changes wait times
- /admin/getqueue
 - Gets the entire queue with the information on each customer
- /admin/markbarber

- Marks the barber who removed a customer (took up a customer)
